

## 37-3B-High- voltage tester

### High voltage tester 37-3B manually adjustable

- Test voltage 0 .. 5,000 VAC  
potential-free
- Tripping current 0 .. 100 mA

## 37-3B-High- voltage tester

- ELABO System 266

---

### **HV test**

- Voltage manually adjustable: potentialfrei
- Test voltage (general): 0 .. 5.000 VAC
- Tripping current: 0 .. 100 mA
- Tripping current manually adjustable
- Burn mode
- Output power: 500 VA
- Contact monitoring by reading the minimum current

---

### **Display / Operation**

- Combined instrument (digital) for test voltage and test current, switch-selectable

---

### **Equipment data**

- Mains voltage: 0 - 230 +10% -5% (49 .. 61 Hz)
- Safety class: I
- Slide in technique: ELABO System 266 / 2 WU

---

### **Extensions / Options**

- Factory calibration certificate (optional)

---

### **Order data**

- Order description: High- voltage tester
- Order number: 37-3B.3

---
