

90-3R-U-/I-measuring module

U-/I-measuring module for system applications 90-3R

- Function test 0 .. 500 V, 0 .. 5A

Functional testing

- Voltage measurement : 0 .. 500 V
- Current measurement: 0 .. 5,00 A
- Measurement accuracy - display: +/-1% v.M. +/- 2dig.
- Measurement accuracy - analog output: +/- 0,6% v.M. +/- 10mV

Equipment features

- Digital and analog interface for external control of the device as well as for interrogation of measurements and equipment status
- Calibration sockets on the front-panel

Interfaces

- digital-/ analog interface
- Analog interface

Important options

90-3R-U-/I-measuring module

- Further current and voltage measurement ranges are available on request
 - Limit value module (optional)
-

Equipment data

- Mains voltage: 0 - 230 +10% -5% (49 .. 61 Hz), 230 +/- 10%
 - Safety class: I
 - Slide in technique: 24
 - Height : 3 HU
-

Order data

- Order description: U-/I-measuring module
 - Order number: 90-3R.3
-
