

## 90-7A-Alternating current voltage supply

### **Alternating current voltage supply system 90-7A electromechanically controlled programmable**

- Voltage supply system 0 - 265 V / 1,000 VA

---

#### **Display / Operation**

- Separate digital instruments for test voltage and test current

---

#### **Equipment features**

- Test object connection and fusing on the front-panel.
- Display of current and voltage. Electromechanical voltage regulation via variable-ratio transformer.

---

#### **Interfaces**

- digital-/ analog interface
- Analog interface

---

#### **Important options**

- electrical outlet for other countries (optional)
- Further current and voltage measurement ranges are available on request (optional)

---

#### **Technical data**

- Output voltage: 0 - 265 V
- Frequency: 50 HZ
- Max. power: 1000 VA
- Control precision:  $\pm 1$  % v.E.
- Control rate: max. 50 V/s

---

#### **Equipment data**

- Mains voltage
- Safety class: I
- Slide in technique: 19"
- Height : 4 HU

---

#### **Order data**

- Order description: Alternating current voltage supply

## 90-7A-Alternating current voltage supply

- Order number: 90-7A.3
