

## 90-7F-Alternating current voltage supply

### **Alternating current voltage supply system 90-7F fully electronically controlled programmable**

- Voltage supply system 0 - 135/265 V / 220 VA
- Variable frequency selection 45 - 400 Hz

---

#### **Display / Operation**

- digital display for frequency 4-digit
- Separate digital instruments for test voltage and test current

---

#### **Equipment features**

- Test object connection and fusing on the front-panel.

---

#### **Interfaces**

- digital-/ analog interface
- Analog interface

---

#### **Important options**

- electrical outlet for other countries (optional)

---

#### **Technical data**

- Output voltage: 0 - 135 / 265 V
- Frequency: 45 - 400 Hz
- Max. power: 220 VA
- Control precision:  $\pm 0.2$  % v.M.
- Control rate: max. 400 ms

---

#### **Equipment data**

- Mains voltage: 0 - 230 +10% -5% (49 .. 61 Hz)
- Safety class: I
- Slide in technique: 19"
- Height : 4 HU

---

#### **Order data**

- Order description: Alternating current voltage supply

euromicron Gruppe

## 90-7F-Alternating current voltage supply

- Order number: 90-7F.3
